3 - FROM SOIL TO GLASS

At Château Tronquoy, everything begins with the soil.

This immersive experience takes place in the heart of the vineyard, offering direct contact with the earth, which guests are invited to observe, touch, and explore. The visit begins at the top of Terrace No. 03, an emblematic terroir of the great Médoc estates.

At Tronquoy, this terrace is characterized by a high proportion of clay, a defining feature of the estate. Since 1745, this soil has formed the historic foundation of the property and was the site of the first Merlot plantings.

The experience concludes with a guided tasting of three wines, designed to highlight the influence of terroir on the structure and balance of the wines.

Finally, a creative workshop extends this hands-on immersion: each participant shapes a small clay object as a lasting souvenir of their visit to Château Tronquoy.
