There are three circuits

- A walk of 4 km, marked in yellow (1 hour).
- A walk of 7 km, marked in blue, with several different landscapes (1 hour 30).
- A walk of **9 km** marked in red, approximately, between 2 and 3 hours offering varied scenery.

The start point:

All 3 circuits leave from the Mairie in Sadillac. (Then, go to the church by the street: « Rue des Bons pains »)

The arrows (painted in white) which mark out your course take you in a clockwise direction or PDIPR poles with yellow cap.

You will find, at points indicated on the map, various information panels.

On these panels, you will find QR CODES which allow you to obtain, on your smartphone, more details of the history of our area.

Place Ste Anne in Sadillac

The windmill of Citole offers some unusual features:

- The surrounding support wall was in part dismantled in the 1930's. Our Association hopes to restore and rebuild it with the help of volunteers.
- On the lintel of the north door you will see the name of the builder sculptured in the stone (Pierre GAIMAN, a mason of Sadillac in 18 th century) as well as the year of construction (1765).

Windmill of Citole before clearing

Windmill of Citole after restoration

After the mill of Citole you will drop down towards Bonnefin brook; this portion of the path leads you back towards Sadillac.

You will be walking in the steps of Catherine de Medicis and the royal court (7000 people) who took the "vielh camin" on the 8 th August 1565 during their journey from Lauzun to Bergerac.

Good hiking

HIKES AROUND SADILLAC

Circular walks around the Windmills of Sadillac (Les boucles des Moulins à vent de Sadillac)

Our association "Friends of the windmill of Citole" offers three circular walks named "Les boucles des moulins à vents de Sadillac".

As part of the project to restore the mill of Citole, we have cleaned the site and several kilometers of tracksto make them accessible to walkers, mountain bikers, horse riders, and other nature lovers ...
